

CINAHL[®] COMPLETE

Available via EBSCOhost[®]

Introduzione a Cinahl *Complete*

A cura di Luisa Banzato e Lisa Dainese

Contenuti della presentazione

Questa presentazione si propone di illustrare gli elementi costitutivi di CINAHL e di offrire indicazioni di base per la ricerca bibliografica.

Per maggiori approfondimenti si rimanda agli strumenti didattici di Ebsco Host accessibili dall'Help comprendenti numerosi tutorial.

CINAHL Complete

Cinahl è la risorsa più completa di scienze infermieristiche e professioni sanitarie.

- Più di 5,4 milioni di citazioni
- Più di 1400 riviste in full text
- Copertura dal 1937
- Riferimenti citati da più di 1500 riviste
- E-book di area infermieristica e professioni sanitarie
- Evidence-based care sheets
- Quick lessons

Punti di accesso a Cinahl

La ricerca base

Operatori logici
AND, OR, NOT e
"frase esatta"

Se si inseriscono più termini
senza operatori, la banca dati
utilizza l'operatore
di prossimità «Near N5»
Quindi termini separati
da un massimo di 5 parole.

Search Options

Search Modes and Expanders

Search modes [?](#)

- Boolean/Phrase
- Find all my search terms
- Find any of my search terms
- SmartText Searching [Hint](#)

Operatore logico
AND

Operatore logico
OR

il sistema cerca in base a un testo
fino a 500 caratteri inserito nel box

Opzioni e filtri

La ricerca può essere affinata grazie ai numerosi filtri selezionabili quali:

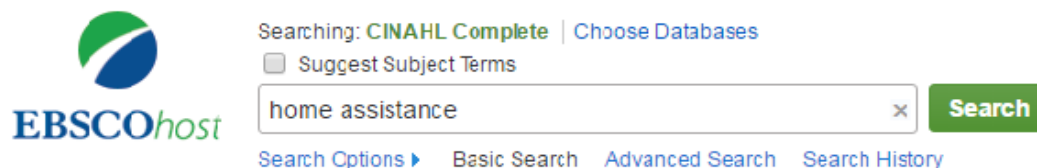

- la possibilità di escludere o limitare la ricerca agli articoli non ancora indicizzati, chiamati **Pre-Cinahl**,
- escludere record **Medline**,
- selezionare solo records di **riviste peer-reviewed** – cioè sottoposte a valutazione anonima di esperti... etc.)

E' rischioso inserire troppi filtri!

Esempio: home assistance

Ricerca base (boolean/phrase)

The screenshot shows the EBSCOhost search interface. On the left is the EBSCOhost logo. To the right, it says "Searching: CINAHL Complete | Choose Databases". Below that is a checkbox for "Suggest Subject Terms". A search input field contains the text "home assistance" and has a small 'x' icon to its right. To the right of the input field is a green "Search" button. Below the search bar are links for "Search Options", "Basic Search", "Advanced Search", and "Search History".

Source: American Journal of Occupational Therapy (AM J OCCUP THER), Sep/Oct2015; 69(5): p1-p9. (9p)

Publication Type: Article - research, tables/charts

Language: English

Major Subjects: Caregivers
Activities of Daily Living
Home Environment -- Evaluation
Architectural Accessibility -- Evaluation
Occupational Therapy Assessment -- Methods
Clinical Assessment Tools
Instrument Validation

Minor Subjects: Human; Funding Source; Pilot Studies; Psychometrics -- Evaluation; Occupation (Human); interviews; Scales; Interrater Reliability; validation Studies; Internal Consistency; Criterion-Related Validity; Content Validity; Sensitivity and Specificity; Reliability and Validity; Cross Sectional Studies; Missouri; Neuropsychological Tests; Qualitative Studies; Constant Comparative Method; Thematic Analysis; Summated Rating Scaling; Observational Methods; Functional Assessment; Aptitude -- Evaluation; Self-Efficacy -- Evaluation; Data Analysis Software; Descriptive Statistics; Coefficient Alpha; Spearman's Rank Correlation Coefficient; Intraclass Correlation Coefficient; Male; Female; Middle Age; Aged; Aged, 80 and Over; Young Adult; Adult; D. Value

Abstract: Home modification interventions have the potential to provide support to informal caregivers; however, the impact of these interventions on caregivers is understudied, and adequate assessments are lacking. This study describes the development and preliminary psychometric properties of a performance-based assessment that identifies environmental barriers to performance of daily caregiving activities. An existing assessment of person-environment fit was modified using key informant interviews and was administered to 31 informal caregivers. The In-Home Occupational Performance Evaluation for Providing Assistance demonstrated reliability across raters, good internal consistency for all subscales, and convergent validity with existing measures. This assessment has the potential to guide home modification interventions and measure the impact on informal caregiving in the home.

48. **Assessing the Knowledge Regarding Cord Blood Banking among Nurse Educators, Staff Nurses and Nursing Students.**

Academic Journal

Thomas, Timi; International Journal of **Nursing** Education, Apr-Jun2017; 9(2): 149-154. (6p) (Article) ISSN: 0974-9349 AN: 122807559

Subjects: Umbilical Cord Blood Banks; **Nursing** Knowledge; Faculty, **Nursing**; Staff Nurses; Students, **Nursing**

[HTML Full Text](#) [PDF Full Text](#)

311. **Deep nursing: a thoughtful, co-created nursing process.**

Academic Journal

(includes abstract) Griffiths, Colin; **Nursing** Management - UK, Apr2017; 24(1): 27-30. (4p) (Article) ISSN: 1354-5760 AN: 122174351

Abstract: This article examines some of the challenges in **nursing** practice experienced by patients and nurses in the UK and Ireland, and considers some of the associated stressors in the system. Nurses must respond to these challenges by crafting their own practice, and the article offers a blueprint for developing personal **nursing** practice through acceptance, paying detailed attention to patients, taking time with patients and personal reflection. It draws on innovations in learning disability practice to suggest that care should be jointly thought through and co-created by patients and nurses, and that this process of thoughtful engagement constitutes 'deep **nursing**'.

Subjects: **Nursing** Practice; **Nursing** Process; Nurse-Patient Relations; Patient Centered Care

Esempi di record presenti nella risorsa.

Se il full text non è disponibile in Cinahl controllare se l'Ateneo ha acquistato l'abbonamento al periodico cliccando **AireGO**.

Se non si possiede la rivista online o cartacea si può sempre richiedere l'articolo tramite **NILDE**

Ricerca con CINAHL headings

Si accede al vocabolario controllato dalla barra (voce CINAHL headings) oppure dal box di base attivando prima l'opzione Suggest Subject Terms

The screenshot displays the EBSCO HOST search interface. At the top, a blue navigation bar contains the following items: [New Search](#), [Publications](#), [CINAHL Headings](#) (circled in red), [Evidence-Based Care Sheets](#), and [More ▾](#). Below the navigation bar, the EBSCO HOST logo is on the left. The search status is shown as "Searching: CINAHL Plus with Full Text | [Choose Databases](#)". A checkbox labeled "Suggest Subject Terms" is checked and circled in red. Below this, there are three search input fields. The first field is empty, and the second and third fields contain "AND" in a dropdown menu. Each field has a "Select a Field (optio..." dropdown menu to its right. To the right of the first field are "Search" and "Clear" buttons, and a help icon (?). To the right of the third field are "+" and "-" buttons. At the bottom, there are links for [Basic Search](#), [Advanced Search](#), and [Search History](#).

Dando la spunta si visualizzano i subheadings (aspetti su cui focalizzare la ricerca)

Da qui qui è possibile selezionare i Subject headings classificati come Major Concept

- Neuromuscular Blockade
- Noninvasive Procedures
- Orthoses Fitting
- Parabiosis
- +** Patient Positioning
- Patient Selection
- Perceptual Masking

Uso di cartelle

È possibile selezionare e inserire dei records in una cartella per un uso immediato: stampa, spedizione email, salvataggio come file o esportazione (p. es. in Refworks)

Per salvare collezioni di records o strategie di ricerca è necessario crearsi un account in Cinahl 

L'Ateneo ha acquistato molte banche dati dello stesso fornitore che si possono consultare dalla stessa piattaforma.

Creare una propria cartella significa salvare dati recuperati anche da E-Book Collection, Psychology and Behavioral Science, PsycINFO e SPORTDiscus e molto altro.
